Tron World Decentralized Exchange Model

Why would I want to participate in this and purchase TRW tokens?

This is a unique exchange that works differently from any other you've ever visited. You'll want to participate in this because:

Fraud-proof. The Tron you enter into the system isn't being held by any person or group. The Tron in the exchange is handled only by a production open-source Tron smart contract. Contracts are immutable and this means there is no owner who could decide they wanted to keep the Tron for themselves (i.e exit scam is an impossibility).

Transparent. You can see the full source code for the contract managing this exchange. The rules of the exchange are clearly posted and **no promises are**

Being made. There is a clear culture of honesty and transparency amongst the community and above all by the admins and developers.

Decentralized. The entire exchange backend is **powered by the smart contract which lives on the Tron blockchain** and is "owned" by no one. If the site goes down, the contract can always be accessed by alternate front-ends. The contract simply operates according to rules that are fair and can't be changed.

Active. There is already a large community around this project. Many users in a supportive community. Join the Official Telegram Group chat and use the #helpdesk if you have questions or just come in to say hello. Many people are committed to the success of this project and to helping newcomers. This exchange is being developed by a distributed collection of admins and software engineers with a wide range of apps and services available for this ecosystem (charts, store, alternate UIs). You can be sure that this is just the beginning and there is a lot in store for TRON WORLD!

How does this work?

The rules of this coin are simple yet also brilliant. Quick summary:

Initial Token Price : 0.0015 USD

Buy Tokens. Buy TRW tokens at the Market Price , Buy Price Depends on ROI Investments (Example : If ROI Investment Increase 1000000 TRX in Smart Contract, then increase a token price by 5%.

Sell Tokens : Sell TRW tokens at the Market Price , Sell Price Depends on ROI Investments (Example : If ROI Investment Decrease 1000000 TRX in Smart Contract, then decrease a token price by 5%.
